PROJECTS

Slackbot Router App (GitHub | Article)
Node.js | AWS | APIs | Tape | Sinon
Collection of bots that deliver information using a router setup which asynchronously parses and forwards incoming messages to Lambdas; currently being used by the Humanitarian OpenStreetMap Team.

PeerPostie (Watch pitch)
React | Redux | Node.js | Express.js | GoogleMaps API
Prototype for a peer-to-peer delivery service focused on local communities and businesses.
Acted as lead developer for the team and won second equal in Hack the Crisis NZ 2020 hackathon.

Portfolio (GitHub | Link)
Gatsby | React | Styled Components | Netlify | Figma
Website for my software development work.
Designed using Figma, built with Gatsby (React) and Styled Components and hosted on Netlify.

Wa
React | Redux | Node.js | Express.js | SQLite3 | Jest
Location-based time-banking application where users can offer and request services using time as currency.

TECH SKILLS

- Javascript & Node.js
- Cloud-computing platforms—AWS & Netlify
- Express.js
- React
- Redux
- Gatsby
- REST-ful APIs
- HTML and CSS—including CSS frameworks
- Testing suites—Jest, Tape, Sinon, Enzyme, Supertest
- UI/UX design tools—Figma, Adobe XD
- Version Control with Git

WORK EXPERIENCE

SOFTWARE DEVELOPER
Runn.io | October 2020 - Present

SOFTWARE DEVELOPER (INTERN)
Humanitarian OpenStreetMap Team | May - August 2020

- Developed a Slack app from scratch to improve internal comms and increase efficiency bearing in mind maintainability, scalability, and cost-efficiency as per the needs of a free, open-source software community.

- Created the application using AWS services—Lambda functions to handle application logic, API Gateway for routing, SNS for pub/sub service, and CloudFormation to codify the infrastructure. Also Utilised the Slack API, and different OpenStreetMap APIs and tools.

WEB DEVELOPER
Freelance | January 2020 - Present
Building static and dynamic websites for clients using Javascript frameworks and libraries—React, Redux, Gatsby—Node.js, Express, SQLite3, and Netlify

SALES AND EVENTS MANAGER
Joylab Restaurant Group - Regatta Bar & Eatery | March - July 2019

- Created strategies to generate revenue and maximise venue sales

- Grew relationship with existing clients and built connections to businesses in the area to increase event bookings in the venue.

MARKETING AND EVENTS COORDINATOR
Takapuna Beach Business Association | September 2015 - December 2018

- Managed the 'I Love Takapuna' digital brand including social media, website, and e-newsletters with social media engagement boosted by more than 50% during my time in the role.

- Attracted thousands of visitors to the town centre and increasing economic activity by up to 15% compared to the year previous by putting on community events.

OTHER SKILLS

Project management
Heading projects including budget planning, negotiating with clients and suppliers, and managing team members and suppliers

Communication skills
Liaising with stakeholders including clients, suppliers, community groups, and government agencies

Content writing
Crafting and editing articles and stories that engage audiences in a variety of ways

EDUCATION HISTORY

ENSPIRAL DEV ACADEMY
Web Development Bootcamp

- Simulated work environment using topical web development tech stack and following Agile and Scrum principles

- Completed projects with tight deadlines, doing project planning, coding, debugging, testing and presenting to tech and non-tech audiences. Worked solo, in pairs, and in groups.

DE LA SALLE UNIVERSITY
Bachelor of Arts in International Studies

- Graduated with First Class Honours
- Awarded Outstanding Thesis
